

## **ISI Announces Addition of RSM Partners as a Strategic Business Partner in UK**

*Infrastructure Solutions, Inc. (ISI), a leading provider of IT infrastructure assessment and optimization software products and services, announced the addition of RSM Partners Ltd has as a strategic business partner in the United Kingdom, Americas and APAC.*

Minneapolis, MN ([PRWEB](#)) October 23, 2012 -- Infrastructure Solutions, Inc. (ISI), a leading provider of IT infrastructure assessment and optimization software products and services, announced the addition of [RSM Partners Ltd](#) has as a strategic business partner in the United Kingdom, Americas and APAC.

RSM Partners Ltd is the leading mainframe consulting firm in the United Kingdom specializing in IBM's z Systems mainframe platform. RSM provides a full range of technical value-added services and software solutions including network hardware, software and middleware for the z/OS operating system. RSM utilizes a best practices approach in their respected technical consultancy; support services; software migration; virtualization and cloud computing services; implementation & deployment of IBM & 3rd party z software; and IBM z System training services. In addition, RSM offers z System hosted services and training from their high tech offices near Birmingham in the UK where they run their own z System mainframe.

RSM also provides their business clients a number of powerful niche software tools that have been selected for delivering significant value in optimizing performance and maintaining a z System environment. These software tools help clients increase the efficiency of the businesses they run on the z System platform which add to their operating results.

Commenting on the agreement, Mark Wilson, RSM Director, said "RSM sees high value in the ISI Snapshot IT discovery and efficiency measurement capabilities. We can see real benefit for our clients as a means for clearly quantifying cost reduction opportunities across their IT landscape in terms of platform consolidation, virtualization and cloud adoption."

"We are happy to join with RSM Partners, the leading z System consulting firm in the UK, in providing ISI Snapshot's industry trusted inventory and discovery capabilities for identifying IT savings opportunities for businesses, and for maintaining peak performance for enterprise clients that run their critical business operations on IBM's z System mainframes."

Snapshot, ISI's flagship software application, delivers comprehensive visibility of IT system hardware and software components across diverse IT open systems including various host platforms, SAN switches, storage arrays, routers and switches on physical, virtual, or cloud platforms.

Snapshot has been used to help public and private clients—across a wide range of industries—with IT security and performance optimization. To learn more about ISI's Snapshot software or to request a demo, visit <http://www.isiisi.com>.
